## Colorado Snapper

### CHARACTERISTICS

Colorado snapper is not often available - mainly due to restrictive management put in place to help manage populations. However, when we do get this fish in, put it on your specials board - it's delicious! Works great with fresh spring herbs and vegetables.

### FOR YOUR MENU

Colorado Snapper is a real treat - with a mild, slightly sweet flavor, it cooks up moist and flaky. A versatile fish; roast it, bake it, grill it, saute it or feature it whole (when sizing is right). Like most snappers, it has great customer appeal!

### FOR YOUR WAITSTAFF

This snapper is a perfect fish - even for people who claim they don't like fish. It's so mild and delicious.

### FOR YOUR RETAIL DISPLAY

Snappers make a great addition to your retail case - whole and fillet fish!
