A PASSION FOR SEAFOOD

## FLORIDA STONE CRAB CLAWS

WILD CAUGHT FROM FLORIDA  
AVAILABLE VIA SPECIAL ORDER

Florida stone crab claws (*Menippe mercenaria*) contain a delicious meat - sweet and succulent with a delicious crab flavor! Since they come in fully cooked, they couldn't be any easier to work with.

Getting at the meat is half the fun! Serve these claws whole and let your customers enjoy themselves cracking them open to get at the meat. If your establishment isn't quite right for a full-on crab feed you can still utilize this delicious seasonal option in soups, salads and other crab friendly dishes.

Stone crab meat is sweet, delicious and only available fresh for a limited time - if you have it on the menu it's a real seasonal treat, encourage customers to try it while they can! A real renewable resource, crabs are taken from the pots live, one claw is removed and the crabs are returned to the sea where they regenerate a new claw after about a year!

Rated **GREEN** for Best Choice in Sustainability by Monterey Bay Aquarium Seafood Watch Program.
