FARM RAISED FROM BRITISH COLUMBIA
.....

Buckley Bay Oyster (*Crassostrea gigas*) is a Pacific Oyster from Baynes Sound, southern Vancouver Island in British Columbia, Canada. These 3" to 3.5" size oysters are tray-raised and beach finished resulting in a strong shell that makes it easy for shucking!

With its fantastic plump meat to shell ratio, Buckley Bay Oysters has a sweet flavor with a light brine finish and earthy organic undertones. Feature these oysters raw or cooked - your customers will love them! Like all West Coast oysters you can count on full, robust flavor, so work in your favorite accompaniment, or try them hot off the grill.

- Available year-round
- Rated green for Best Choice in sustainability by the Monterey Bay Aquarium Seafood Watch Program.
